A massive solar plant in the Mojave Desert is lying dormant just 11 years after it went into operation and there are significant environmental concerns.

A dramatic drone video shared by Duke Energy shows the path of destruction through a solar power plant in Florida from a tornado spawned by Hurricane Milton in Sylvan Shores.

Duke Energy's Lake Placid Solar Power Plant experienced an EF-2 tornado during Hurricane Milton, shredding a swath of solar modules while leaving most of the facility intact.

What was once the largest solar power plant of its type in the world appears headed for closure just 11 years after opening.

Duke Energy suffered damage to its solar power plant in Lake Placid. Stasko confirmed a tornado was responsible. From a bird's eye view, a large swath of damaged solar panels is evident. ...

Thousands of panels on a solar farm southwest of Houston, Texas, were damaged by a powerful hailstorm on March 15. Aerial footage showed rows of cracked photovoltaic cells at the ...

The reason why a \$2 billion solar farm in the California desert "failed" has been revealed, after authorities decided to pull the plug on the ambitious project.

On October 9, 2024, an EF-2 tornado, a direct result of Hurricane Milton, struck the Lake Placid Solar Power Plant located in Sylvan Shores, Florida. This severe weather event highlighted the ...
