For Australia, one of the world's largest exporters of coal and gas, there is plenty to take from this, with China's furious electrification paving the way for the rest of the world to follow.

There is huge potential for enhanced Australia-China collaboration in areas of mutual interest, including solar R& D (UNSW and JA Solar joint lab), green iron (Fortescue and China Baowu ...

The dual scenes - a below-capacity solar giant and a colossal new dam - capture the immense scale and complex challenges of China's energy transition.

CEF forecasts that through to 2040, China will install a world-leading 323GW per annum of solar capacity, 80GW of wind, 1GW of hydropower and 3GW of nuclear.

The Wollar Solar Project in Australia, developed by Beijing Energy International Holding Co., Ltd. (BJEI), a subsidiary of Beijing Energy Holding Co., Ltd., has been connected to the grid at ...

Lightsource bp has announced the sale of five large-scale solar projects with a combined generation capacity of 1,037 MW (dc) to China-headquartered Beijing Energy International Australia (BJEI ...

China's JinkoSolar has submitted plans for a 600MW solar-plus-storage project in Queensland, Australia, to the federal government.

While Australia debates the merits of going nuclear and frustration grows over the slower-than-needed rollout of solar and wind power, China is going all in on renewables.
