CATL has already made its mark in Brazil, powering the country's first utility-scale storage project, the Registro Energy Storage Project, in 2022. After three years of stable operation,...

That's the reality of hybrid energy storage projects in South America, where countries like Chile and Brazil are leading a renewable energy revolution. With ambitious climate goals and an ...

Recently, a 25MWp photovoltaic energy storage project undertaken by Sano Energy at a South American mine successfully achieved its first grid connection and power generation.

The opportunities for battery energy storage systems are growing rapidly in Latin America. Below are some key details for those who want to understand and succeed in the BESS ...

The projects include about 600 miles of new transmission and 400 miles of recondored wiring as well as grid-enhancing technologies, long-duration energy storage, solar energy and microgrids.

South America is rapidly adopting advanced energy storage systems to stabilize its renewable energy grid and meet rising power demands. This article explores cutting-edge storage technologies, ...

Our goal in the coming years is to continue expanding our installed capacity in Chile and the Southern Cone with a robust portfolio of solar and storage projects, primarily focused on ...

As Latin America approaches a new renewable expansion phase toward 2026, industry executives highlight energy storage regulation, bankable power purchase agreements (PPAs), and ...
