Now free of crippling sanctions, Syria is hoping renewable energy will become more than a patchwork solution.

Syria's new leaders are hoping renewable energy will now become more than a patchwork solution.

Syria's largest city lay largely in darkness, with only scattered glimmers of light from homes that could afford solar panels, backup batteries or private generators. Al-Jenan went thousands of ...

Investor appetite for Syrian renewables is growing as residential solar capacity is estimated to exceed 2 GW amid efforts to rebuild a shattered power system.

The easing of some sanctions has made it easier for Syrian businesses to import solar panels, inverters, and batteries. This has sparked growth in a new sector of solar energy companies, ...

With the recent lifting of sanctions, Syria is looking to solar power as a solution to its ongoing energy crisis. For years, the country has struggled with intermittent electricity supply, ...

Four importers we spoke to confirmed that most solar panels and batteries are shipped from China to Syria through Jebel Ali Port in the UAE or, at times, the Port of Aqaba in Jordan.

As the national electricity grid deteriorated, solar panels began appearing on rooftops of homes, hospitals and schools. Citizens, driven by survival, imported panels directly and created ...
