Once completed, the 2,000 MW Bellefield project is expected to be the largest solar-plus-storage facility in the United States.

The US Department of Energy says the Stafford Hill Solar Farm is the first project to establish a micro-grid powered solely by solar and battery storage.

Hengtong Group announced today, on January 7, 2025, that this development marks the launch of "China's first" PV project aimed at ecological remediation of tidal flats. The project ...

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, California,...

The Edwards & Sanborn solar-plus-storage project in California is now fully online, with 875MWdc of solar PV and 3,287MWh of battery energy storage system (BESS) capacity, the world's ...

1978 NASA's Lewis Research Center dedicates a 3.5-kilowatt photovoltaic (PV) system it installed on the Papago Indian Reservation located in southern Arizona--the world's first village PV system.

The California Energy Commission (CEC) approved the Darden Clean Energy Project, the first to be fast tracked under its Opt-In Certification program. The CES said that this battery ...

This project is one of the key agricultural photovoltaic power generation projects in Wanning City, making full use of the local barren slopes and abundant solar energy resources, transforming natural ...
