China's largest vanadium flow battery (VFB) energy storage power station has reached full-capacity operation, as the China Three Gorges Corporation (CTG) confirmed that its Jimsar 200 ...

One of the state-approved large-scale new energy bases, the project in Ordos city of Inner Mongolia will include 8 gigawatts (GW) of solar power installations, 4 GW of wind power, 4 GW of ...

On January 23, 2026, the 100MW tower-type molten salt photothermal power generation project of Three Gorges Energy, in which Shouhang High-tech was a key member of the consortium, ...

Rongke Power and China Three Gorges Corporation have brought online the world's first gigawatt-hour-scale flow battery energy storage project.

This project is home to China's largest grid-connected energy storage power plant, featuring a capacity of 201 MW with a storage capability of 402 MWh, distributed across 60 containers.

Earlier this month, Qinghai started construction on a pumped-storage power station with a maximum energy storage capacity of about 20 million kWh in the province's Guinan county in the ...

Located in the Kubuqi desert, the base will have an 8,000 megawatts solar plant, a 4,000 MW wind plant, and a 200 MW optothermal plant, as well as a supporting 4,000 MW coal plant and ...

State-owned Three Gorges Energy has revealed plans for a 16.5 GW renewables project in the Taklamakan Desert. The site will comprise 5 GWh of electrochemical energy storage capacity ...
