Why is CATL launching Tianheng?

CATL's launch of Tianheng represents not only an impressive leap forward in energy storage technology but also signals a trend towards longer-lasting, safer, and more cost-efficient energy solutions that could profoundly impact sustainable industry growth.

What type of battery does Tianheng use?

Tianheng utilizes CATL's L-series long-life, zero-degradation battery cells for extraordinary energy density for lithium iron phosphate (LFP) storage batteries--an impressive 430Wh/L!

What is Tianheng cell?

Tianheng cell units boast an industry-leading PPB-level failure rate, providing significant cost reduction and an increase in internal rate of return (IRR) over each system's lifecycle. Tianheng was unveiled at Beijing's Time Museum under the theme, "Gathering the Power of Time," to emphasize CATL's long-term approach.

What makes Tianheng unique?

Tianheng stands out among similar systems because of its compact size and significant capacity.

On April 9, CATL released the world's first 5-year zero-degradation energy storage system that can be mass-produced - CATL Tianheng.

CATL, the leading lithium battery company, has launched the world's first new energy storage product - Tianheng Energy Storage System. Five years of zero attenuation, rewriting the ...

On April 11, the 12th Energy Storage International Summit and Exhibition (ESIE 2024), hosted by the Zhongguancun Energy Storage Industry Technology Alliance, the China Energy Research Society, ...

(Yicai) April 10 -- China's Contemporary Amperex Technology launched a new 6.25-megawatt-hour energy storage system which is expected to shake up the renewables market due to its promise of ...

Tianheng's launch with "zero degradation" capacity and power over five years marks accelerating the use and quality development of new energy storage solutions.

Chinese battery giant Contemporary Amperex Technology Co Ltd (CATL, SHE: 300750) has launched its new energy storage system Tianheng, or Tener, to further tap the energy storage ...
