About half of the capacity is installed on households - the rest for industrial and commercial use, with a very limited Utility scale solar. Though modest compared to the other Nordic neighbours, the growth ...

The main goals of this project are to 1) Improve efficiency and reduce costs of Operations and Maintenance (O& M) of utility-scale PV parks and 2) Improve performance and reliability of Scatec ...

Norway's rooftops may hold the key to a greener future. A new study reveals the country's buildings could generate vast amounts of solar power--enough to transform its energy landscape. ...

A new research paper has calculated the technical potential of installing solar on building walls and roofs across Norway and the feasibility of integrating the power into the country's grid.

This was the title of the lecture given by Kristian Gautesen, CEO of endra.no, to the Western Norway University of Applied Sciences students on the elective course Solar Technology ...

We are building a large and sustainable wind and solar power producer, delivering renewable energy to Southeast Europe for a more sustainable future. We utilise extensive ...

Norwegian firms are involved in project development, operation and maintenance and/or ownership of large utility scale PV plants, as well as sales and installation of decentralized solar home systems or ...

Norway's eastern region, including the capital city of Oslo, showed the highest potential for solar PV installations. However, the research goes beyond these technical calculations to explore ...
