The Vatican is now completely powered by a farm that sports solar panels to help shade-tolerant crops thrive. This new coupling of solar and agriculture is growing fast.

Vatican City has achieved complete energy independence through renewable sources, making it one of only eight countries running on renewable energy worldwide.

Vatican City has joined Albania, Bhutan, Nepal, Paraguay, Iceland, Ethiopia and the Democratic Republic of Congo to become one of just eight countries in the world to generate 100% ...

Vatican City to become 100% solar-powered, joining a select group of green energy leaders. Pope Francis emphasizes the ethical and social imperative of combating climate change. ...

Vatican City joins Albania, Bhutan, Nepal, Paraguay, Iceland, Ethiopia, and the Democratic Republic of the Congo as countries running on renewable energy. These seven nations ...

In 2025, the Vatican City flipped the switch on something much bigger than its size. A full transition to solar power. So from now on, the seat of the Catholic Church runs almost entirely on ...

Given its small size, Vatican City faces unique challenges in spatial planning for renewable projects. Despite these size constraints, innovative solutions continue to surface, demonstrating that limited ...

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.
