---

33140-15A 3.6V 15Ah LMFP lithium ion Cylindrical battery cell with high security, low-temperature resistance, high cycle life, full tab process, and high voltage platform

Basically, these cells measure 18mm in diameter and 65mm in length. That extra "0" at the end simply tells you it is a cylindrical shape. Think about it. These exact dimensions changed the ...

Gotion brand new cylindrical 33140 batteries, 3.2V 15ah ...

Feature highlights: High-capacity 15.5Ah LiFePO<sub>4</sub> cylindrical battery cell with a long cycle life of 3000 times @ 80% DOD, suitable for solar storage systems, EV, and various applications.

The full battery designation identifies not only the size, shape and terminal layout of the battery but also the chemistry (and therefore the voltage per cell) and the number of cells in the battery.

Cylindrical batteries are typically categorized by standardized sizes defined by the International Electrotechnical Commission (IEC) and American National Standards Institute (ANSI). ...

Designed for energy storage, electric vehicles (EVs), renewable energy systems, and industrial applications, this cell provides exceptional cycle life, safety, and efficiency. High Capacity & Voltage: ...

High cycle life, with more than 2000 times cycle life, better than traditional NMC battery Adopting full tab technology, with low internal resistance, which is suitable for fast charging
