How does energy storage work in the EU?

The main energy storage method in the EU is by far 'pumped storage hydropower', which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example on a sunny or windy day - and releasing it when more energy is needed.

How does the European power exchange work?

EPEX SPOT: Today, energy is bought and sold via the online trading platform of the European Power Exchange. The main services are Day-ahead trading and intraday trading. Participants: Electricity producers, electricity suppliers, traders and industrial end-users can buy and sell electricity for tomorrow or for the day itself.

What is the European energy storage inventory?

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the first European-level tool of its kind and offers energy storage data across a full range of technologies.

Discover how innovative collaboration frameworks are reshaping energy storage projects worldwide, with actionable insights for businesses and governments.

The main types of energy storage systems are lithium-ion batteries, flywheels, and thermal energy storage. Each provides unique advantages for optimizing energy efficiency. [pdf]

As the industry evolves, so do the cooperation methods for energy storage power stations. Whether through joint ventures, technology sharing, or innovative financing models, the right partnership can ...

For over 50 years (since 1972), the Coo power station has played a core role in our energy mix. It is vital to covering the growing need for flexibility triggered by the energy transition and the intermittent ...

The main energy storage method in the EU is by far "pumped storage hydropower", which works by pumping water into reservoirs when there is an electricity surplus in the grid - for example ...

Brussels (Brussels Morning) - ENGIE is constructing a massive Battery Energy Storage System (BESS) in Vilvoorde, Belgium, with 200 MW capacity and 800 MWh storage, aiming to support 96,000 ...

What is the cooperation model for the Brussels energy storage power station
