To access additional data, including an interactive map of global wind farms, a downloadable dataset, and summary data, please visit the Global Wind Power Tracker on the Global Energy Monitor website.

Wind power advocates argue that periods of low wind can be dealt with by simply restarting existing power stations that have been held in readiness, or interlinking with HVDC.

It will be co-located with the existing Fengxian offshore wind farm, allowing for more efficient use of marine space. With a planned installed capacity of 500 megawatts, the facility is ...

Providing the estimated wind power density at 50 meters above the ground, these maps are suitable for distributed wind energy, which powers nearby users, such as communities looking to lower utilities ...

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

The turbines for Phase 1B are located in the Fengxian District, Shanghai, China, with exact coordinates for Phase 1 being 30.7566, 121.8196. The wind farm is owned by Shanghai Electricity Xinda...

To access additional data, including an interactive map of bioenergy power stations, a downloadable dataset, and summary data, please visit the Global Bioenergy Power Tracker on the ...

It is planned in East China Sea, Shanghai, China. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the partially active stage. ...
