Solar panels dot the landscape throughout Hawai'i. Renewables account for one-third of the state's energy mix, and the 500 rooftop arrays on Moloka'i currently generate 15 percent of the...

These eye-catching sights tell a clear story of the island's commitment to sustainability. Run on an advanced hybrid of renewable energy systems, the wind and solar power is combined with a local ...

Let's face it - if you're living on a tropical island or coral reef ecosystem, you're already winning at geography. But here's the kicker: these locations get about 30% more annual sunlight than ...

The island of Ta'u in American Samoa, more than 4,000 miles from the United States' West Coast, now hosts a solar power and battery storage-enabled microgrid that can supply nearly ...

On St. Croix specifically, 9 MW of solar power represents nearly 20% of the island's peak demand, an impressive level of renewable energy penetration for a community of its size.

Off-Grid vs Grid-Connected Island Power Systems The energy supply of a private island often starts off-grid, relying on on-island generation, while grid-connected setups use a submarine cable to link to a ...

Two new solar-plus-battery-storage projects being pursued by Kaua'i Island Utility Cooperative would bring the Garden Isle close to 80% renewable energy before the end of this ...

SINGAPORE - Kusu Island, home to the popular Da Bo Gong Temple and three Malay keramat, is now completely self-reliant in using solar power to produce its own water and electricity, ...
