Although focused on Yaounde, this study could be applied to other cities in Cameroon and sub-Saharan Africa facing similar challenges, thus promoting an integrated approach to ...

Cameroon's national grid loses nearly 35% of generated electricity through transmission inefficiencies [1]. The Yaounde grid-side energy storage project aims to change this narrative through its 52MWh ...

Yet the national household electrification rate stands at only 23% (7). The north is far less electrified (7%) than the south (32%). This is because, the southern network is significantly larger and serves ...

Electricity is produced by various companies operating thermal, wind, hydro, and solar power plants, then transported through regulated transmission and distribution grids, and finally delivered to end ...

Electricity Market Report 2023 - Analysis and key findings. A report by the International Energy Agency.

In this article, we propose a hybrid model of artificial intelligence and statistical methods, designed from an optimization algorithm for hourly forecasts of electricity over a period of one week.

The price of Utilities 1 month (heating, electricity, gas ...) for 2 people in 85m2 flat in Yaounde is \$105 (63,122 Franc)

By examining the specific case of the city of Yaounde, the present study aims to provide elements for a good understanding of the factors behind the increase in house-hold electricity consumption. To this ...
