Younan Company has launched an 880MW solar-plus-storage project in California, marking its entry into utility-scale solar PV in the US.

The state's battery storage capacity, now over 15GW, stores surplus solar energy generated during the day for use in the evening, enhancing grid reliability. David Hochschild, chair of the ...

Younan Company has announced the development of a large utility-scale solar and battery storage project in California under Soleil Renewable Energy, LLC. The project is planned in East ...

The California Energy Commission licenses solar thermal plants above 50 megawatts and promotes solar photovoltaic installation through the Renewables Portfolio Standard, with building efficiency ...

Top 10 Best Solar Panels Produced in Yerevan in San Francisco, CA, United States - Last Updated December 2025 - Yelp - Sutro Power, Albion Power Company, Your Energy Solutions, ...

Zaya Younan, founder and chairman of Younan Company, announced he is entering the large-scale renewable energy construction market with the launch of a utility-scale solar and storage ...

OverviewHistoryPhotovoltaicsSolar thermal powerGenerationGovernment supportState challenges with solar powerPublic opinionSolar power has been growing rapidly in the U.S. state of California because of high insolation, community support, declining solar costs, and a renewable portfolio standard which requires that 60% of California's electricity come from renewable resources by 2030, with 100% by 2045. Much of this is expected to come from solar power via photovoltaic facilities or concentrated solar power facilities.

Arevon Energy 's Eland Solar-plus-Storage Project combines 758 megawatts (MWdc) of solar with 300 MW/1,200 megawatt hours of battery storage.
